

Ellis Woods Park: Phase I Construction

In 2007, KMS began preparing final design and construction documents for the Ellis Woods Park in East Coventry Township. The desire was for a multi-age appropriate active recreation facility. In response, KMS prepared first phase development plans that included play areas for tots and school-aged children, youth soccer and LaCrosse fields, a trail for walking and jogging and a sitting/picnic area. The entire park is accessible to individuals with mobility problems.

Future work will include: a trail network through the Pigeon Creek stream valley, an amphitheater for concerts and other public events, basketball and tennis courts and pavilions for group picnics and community-sponsored activities.

KMS also performed construction contract administration services. Construction was finished and the play areas dedicated in the fall of 2008.
